EDUCATION

Indian Institute of Information Technology Ranchi

Bachelor of Technology in Computer Science Engineering

Ranchi, Jharkhand

Aug. 2023 – 2027

EXPERIENCE

IOT Engineer Intern

Fursat Farms Private Limited

March 2025 – May 2025

- Designed and implemented a device to capture live video feed using an onboard camera.
- Streamed camera input locally with efficient buffering and encoding for smooth performance.
- Developed functionality to upload the video stream to a remote server for real-time access and monitoring.

PROJECTS

Smart Home Automation System

2018 – Present

- Designed and developed a fully functional home automation system to control appliances remotely.
- Enabled device control through mobile app, voice commands, and remote access.
- Built a custom IoT server to handle real-time device communication and command processing.
- Implemented using ESP32, with integrated web development and voice recognition features.

Smart Water Tank Monitoring and Management System

2019 – 2020

- Developed a mobile application to monitor water tank parameters including fill level, usage rate, and depletion estimate.
- Implemented user-wise water consumption tracking for renters, with usage limits and real-time notifications.
- Enabled in-app request system for renters to request additional water allocation beyond their assigned quota.
- Built a working prototype and model, selected for presentation at the national-level innovation event.

Smart Attendance and Access Control System

2023 – 2024

- Developed a custom server managing student ID cards and biometric (FIR fingerprint) attendance marking.
- Implemented photo capture on attendance to prevent misuse of ID cards or fingerprint duplication.
- Tracked entry and exit times by requiring card scan at both points for accurate attendance logs.
- Created a web portal for card management, modifications, replacements, and visualization of attendance data via graphs.

TECHNICAL SKILLS

Programming Languages: C, C++, Python, PHP

Web Development: PHP, HTML, CSS

Embedded Systems & IoT: Arduino, ESP8266, ESP32, Raspberry Pi, Raspberry Pi Pico 2W, IoT Server Development

Platforms & Tools: Arduino IDE, PlatformIO, Raspberry Pi OS, Linux CLI

Hardware: Arduino Uno, Arduino Nano, ESP8266, ESP32, Raspberry Pi Pico 2W, Raspberry Pi 3B, Raspberry Pi 4B

Other Skills: Robotics, Sensor Integration, Voice Recognition, Real-Time Data Monitoring

ACHIEVEMENTS

- **Best Leader:** Awarded for outstanding leadership and team management.
- **State and National Certificate:** Recognized at state and national levels for academic excellence.
- **Science Congress:** Presented innovative work at the Science Congress.
- **Space Day:** Participated in events promoting space and tech awareness.
- **Flipkart Grid:** Competed in Flipkart Grid challenge with tech-based solutions.
- **Toy-Hackathon Final Qualified:** Finalist in Toy-Hackathon with a STEM-based project.
